### JUST TWO PERCENT MATTERS

One time I had trouble with mice, so I bought some d-CON. I noticed on the package that only 2 percent of its contents was actually poison. The rest was edible.

Now if some educated mouse could read, he might reason: "But there is so much good in it, a little bit won't harm me, and besides, I'm hungry." Yet all that good food didn't do that poor creature much good, because the little bit of poison either killed him or gave him some mighty nasty indigestion. 98 percent nourishment was useless if that 2 percent killed him! The 98 percent was not enough to offset the 2 percent. The makers of d-CON know that they have to put much good-tasting food in before mice will be tempted to eat that little bit that kills them.

This is parallel with a situation we often find in religion. Many feel that if there is so much good in their doctrines, a little bit of error won't hurt them. However, the devil is smart enough to give people enough of the truth to make his lies appear wholesome, but just enough error to condemn. No one will benefit from 98 percent truth if there is 2 percent error mixed in with it. Man won't go 98 percent to heaven and 2 percent to hell; he'll go either one place or the other. Did not James say, "For whosoever shall keep the whole law, and yet offend in one point, he is guilty of all?" (James 2:10). The person who rejects 2 percent of the truth of God is guilty, just like the person who rejects all. "The wages of sin is death" (Romans 6:23).

### THE BIG BANG THEORY

I have to come clean and confess that I believe in the Big Bang. Now wait! Don't stop reading here. Let me explain. The Bible itself teaches a "Big Bang." Read it for yourself... "But the day of the Lord will come as a thief in the night; in which the heavens will pass away with a great noise, and the elements shall melt with fervent heat, the earth also and the works that are therein shall be burned up" (2 Peter 3:10).

There you have it... "The Big Bang." The evolutionists are partly right, but their timing is wrong. The Biblical "Big Bang" didn't occur at the beginning of time, as the evolutionists teach.

However, it will occur at the end of time. The "Big Bang" didn't bring things into existence, but it will take things out of existence.

A married couple have made it all the way into their 90's, having been married at age 20. Their doctor is amazed at how spry they are. However, they are starting to show some mental lapses. He recommends that they start to write things down to help them remember. Later that night they are watching TV. The old man gets up; "I'm going to the kitchen, dear. Want anything?" "Yes!" she says. "I'd love some ice cream. Do you want me to write that down?" "No, I think I can remember ice cream." "Oh, and whipped cream," she says. "I know you'll forget that; let me jot that down." "I got it!" he says... "Ice cream with whipped cream on top," he says. "And strawberries. I know you'll forget that." "Quiet woman! Ice cream, whipped cream & strawberries." The old man makes it to the kitchen. She hears him fussing around but soon loses interest and goes back to her TV show. Finally the old man emerges from the kitchen and hands her a plate of bacon & eggs. She looks at the plate quite exasperated. "Where's my toast?"
